

Schools link with each other via Classpals.

As part of the Education Uganda supported school twinning, 3 Andover schools have supported their twin schools with laptops and air time, and in one case a solar panel where there is no electricity so that they can get on line for pupils to talk to each other.

Each week, pupils in Roman Way and Endeavour primaries and Knights Enham Junior in Andover talk to their 'Classpals' in Ibanda, Kyabikuha and Nkaiga primary schools in the Kasese School District, south western Uganda.

The Ugandan teachers have to be very inventive, as some of their schools have no electricity

Here a solar panel links to the small laptop and mobile phone to give an internet connection to a mountain school.
